## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-8, drawn to "Multiple filament light unit", classified in class 362, subclass 211.
  - II. Claims 9-15, drawn to "Vehicle controlling system", classified in class 315, subclass 77.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination (invention II) as claimed does not require the particulars of the subcombination (invention I) as claimed because the limitations including "external connection terminals" and "plural lamps" claimed in the subcombination (invention I) are not required by the claimed combination (invention II). The subcombination (invention I) has separate utility such as the lighting system having plural lamps with plural filament can be used for an airplane or a boat to provide various beams for illuminating in front of the airplane or surrounding areas around the boat.

Art Unit: 2875

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
